TABLE OF CONTENTS

Number 1. January

The Photosynthetic Electron Transport Chain of *Chlamydomonas reinhadi.* VIII. The 520 nm Light-induced Absorbance Change in the Wild-type and Mutant Strains. .....Nam-Hai Chua and R. P. Levine 1–6

Compartmentation of Malate in Relation to Ion Absorption in Beet. C. B. Osmond and George G. Laties 7–14

Local Metabolic Autonomy in *Phycomyces* Sporangiophores. R. Igor Gamow and William Goodell 15–20

Pectin Esterase in Relation to Leaf Abscission in *Colens* and *Phaseolus.* Clifford E. LaMotte, Carl Gochnauer, Lynn R. LaMotte, J. Raj Mathur, and Leslie L. R. Davies 21–26

Radioautographic Analysis of the Distribution of Label from ^{3}H-Indole-acetic Acid Supplied to Isolated *Coleus* Internodes. D. D. Sabnis, G. Hirshberg, and W. P. Jacobs 27–36

Multiple Freezing Points as a Test for Viability of Plant Stems in the Determination of Frost Hardiness. R. C. McLeester, C. J. Weiser, and T. C. Hall 37–44

Leaf Structure and Translocation in Sugar Beet. D. R. Geiger and D. A. Cataldo 45–54

Glycolate Stimulation of Oxygen Evolution During Photosynthesis. Edward B. Nelson, N. E. Tolbert, and J. L. Hess 55–59

A Study of the Aminoacyl-sRNA Synthetases of *Phaseolus vulgaris* in Relation to Germination .....J. W. Anderson and L. Fowden 60–68

Nitrogen Assimilation and Protein Synthesis in Wheat Seedlings As Affected by Mineral Nutrition. I. Macronutrients. James E. Harper and Gary M. Paulsen 69–74

Presence and Possible Mode of Action of a Proteinaceous Gonadotropin-like Growth Regulating Factor in Plant Systems. Y. Leshem, R. R. Avtalion, M. Schwarz, and S. Kahana 75–77

Phorbic Acid Biosynthesis in the Latex Vessel System of *Euphorbia.* Arnold Nordal and A. A. Benson 78–84

Substrate Induction of Nitrate Reductase in Barley Aleurone Layers. T. E. Ferrari and J. E. Varner 85–88

Biosynthesis of Fatty Acids by a Soluble Extract From Developing Soybean Cotyledons ..... R. W. Rinne 89–94

Selective Inhibition by Actinomycin D of the Synthesis in Photosynthetic and Non-photosynthetic Enzymes During the Greening of Etiolated Bean Leaves. B. Andrea Melandri, Assunta Baccarini, and Giorgio Forti 95–100

Inhibition of Gibberellic Acid-induced α-Amylase Formation by Polyethylene Glycol and Mannitol. ..... Russell L. Jones 101–104

Evidence for Bound Phytochrome in Oat Seedlings. Bernard Rubinstein, K. Susan Drury, and R. B. Park 105–109

The Occurrence of Nitrate Reductase in Apple Leaves. Lowell Klepper and R. H. Hageman 110–114

The Respiratory Chain of Plant Mitochondria. I. Electron Transport Between Succinate and Oxygen in Skunk Cabbage Mitochondria. Bayard T. Storey and James T. Bahr 115–125

The Respiratory Chain of Plant Mitochondria. II. Oxidative Phosphorylation in Skunk Cabbage Mitochondria. Bayard T. Storey and James T. Bahr 126–134

A Survey of Plants for Leaf Peroxisomes.
N. E. Tolbert, A. Oeser, R. K. Yamazaki, R. H. Hageman, and T. Kisaki 135–147

Phytochrome in Embryos of *Pinus palustris*.
Elaine M. Tobin and Winslow R. Briggs 148–150

Xanthium Leaf Movements in Light and Dark.
Takashi Hoshizaki, David E. Brest, and K. C. Hamner 151–152

A Technique for the Assay of Enzymes in Intact Plant Cells in the Presence of Dimethylsulfoxide.
Deborah P. Delmer and Stanley E. Mills 153–155

Ethylene Evolution From 2-Chloroethylphosphonic Acid.
H. L. Warner and A. C. Leopold 156–158

Number 2. February

Two Additional Phosphorylases in Developing Maize Seeds.
C. Y. Tsai and O. F. Nelson 159–167

Effects of Freezing and Hardening on the Sulfhydryl Groups of Protein Fractions From Cabbage Leaves ..... Willim M. Morton 168–172

Evidence for Metabolic Turnover of Monoterpenes in Peppermint.
Alice J. Burbott and W. David Loomis 173–179

Effectiveness of Certain Sterilizing Agents for Seedling Incubation in Radiothymidine.
H. A. McQuade, Alice A. Atchison, and J. T. Parisi 180–182

Growth Regulator Induced Movement of Photosynthetic Products Into Fruits of 'Black Corinth' Grapes.
Robert J. Weaver, Wasfy Shindy, and W. Mark Kliewer 183–188

Ethylene Production From Propanal .... Aldolph Baur and S. F. Yang 189–192

Control of Logarithmic Growth Rates of Tobacco Callus Tissue by Cytokinins.
John P. Helgeson, Sharon M. Krueger, and Christen D. Upper 193–198

Studies on Polyphenol Content, Activities and Isozymes of Polyphenol Oxidase and Peroxidase During Air-Curing in Three Tobacco Types.
S. J. Sheen and J. Calvert 199–204

Biological and Chemical Properties of the Epidioxide Isomer of Abscisic Acid and its Rearrangement Products.
Ernest Sondheimer, Barbara M. Michniewicz, and Loyd E. Powell 205–209

Plant Leaf and Stem Proteins. II. Isozymes and Environmental Cabbage.
B. H. McCown, T. C. Hall, and G. E. Beck 210–216

Host-Pathogen Interactions: I. A Correlation Between α-Galactosidase Production and Virulence.
Patricia D. English and Peter Albersheim 217–224

Gene Locus Specificity of the Glucose Effect in the Thiamine Pathway of the Angiosperm, *Arabidopsis*. ..... S. L. Li and G. P. Redei 225–229

Specific Requirement of Potassium for Light-Activated Opening of Stomata in Epidermal Strips ..... G. D. Humble and Theodore C. Hsiao 230–234

Ethylene-induced Isocoumarin Formation in Carrot Root Tissue.
E. Chalutz, J. E. DeVay, and E. C. Maxie 235–241

Glycolate and Glyoxylate Metabolism by Isolated Peroxisomes or Chloroplasts ..... T. Kisaki and N. E. Tolbert 242–250

Kinetics of Abscission in the Bean Petiole Explant.
R. K. dela Fuente and A. C. Leopold 251–254

Absorption of Copper, Zinc, and Manganese by Sugarcane Leaf Tissue. JOHN E. BOWEN 255–261

Relative Activities of NAD- and NADP-Isocitric Dehydrogenases in Bean Mitochondria Modified by Glycerol or NADP .. YUKIO YAMAMOTO 262–266

Gas Chromatographic Analysis of Acidic Indole Auxins in *Nicotiana*. MARGARET H. BAYER 267–271

Changes in Ribonucleic Acid Fractions During Maturation of Mimosa Epicotyl Tissues ..... GREGORY N. BROWN 272–276

Stimulation of Lettuce Seed Germination by Ethylene. F. B. ABELES AND J. LONSKI 277–280

Avena Coleoptile Elongation: Stimulation by Fluorophenylalanine. WILLIAM G. HOPKINS AND KAREN FLACK BONNELL 281–286

Respiratory Metabolism in Mangrove Seedlings. J. M. A. BROWN, H. A. OUTRED, AND C. F. HILL 287–294

Enzyme Activities of the Carbon Reduction Cycle in Some Photosynthetic Organisms ..... ERWIN LATZKO AND MARTIN GIBBS 295–300

The Plasmalemma: Seat of the Type 2 Mechanisms of Ion Absorption. R. M. WELCH AND EMANUEL EPSTEIN 301–304

Inhibition of Tumor Induction by Auxin in Totally Debudded *Nicotiana glauca* × *N. langsdorfii*. IRA H. AMES, THOMAS B. RICE, AND HAROLD H. SMITH 305–307

Ethylene and Ripening of Mangoes. ..... A. K. MATTOO AND V. V. MODI 308–310

Isolation of Tightly Coupled Mitochondria From Acidic Plant Tissues. R. J. ROMANI, IDA K. YU, AND L. K. FISHER 311–312

Hormonal Control of Senescence of Bean Endocarp: Auxin-suppression of RNase ..... JOSEPH A. SACHER 313–314

Oxidation of Paraffins by Plant Tissues ..... P. E. KOLATTUKUDY 315–318

Number 3. March

Seed Germination Studies. III. Properties of a Cell-free Amino Acid Incorporating System From Pea Cotyledons; Possible Origin of Cotyledonary α-Amylase. RICHARD R. SWAIN AND EUGENE E. DEKKER 319–325

Ethylene as a Component of the Emanations From Germinating Peanut Seeds and Its Effect on Dormant Virginia-type Seeds. D. L. KETRING AND P. W. MORGAN 326–330

Reversal of Copper Inhibition in Chloroplast Reactions by Manganese. HELEN M. HABERMANN 331–336

Stimulation of Ethylene Evolution and Abscission in Cotton by 2-Chloroethanephosphonic Acid ..... PAGE W. MORGAN 337–341

Prunin Identification, Biological Activity and Quantitative Change in Comparison to Naringenin in Dormant Peach Buds. A. EREZ AND S. LAVEE 342–346

Influence of Certain Cations on Activity of Succinyl CoA Synthetase From Tobacco ..... LOWELL P. BUSH 347–350

Photoreaction of Manganese Catalyst in Photosynthetic Oxygen Evolution. G. M. CHENIAE AND I. F. MARTIN 351–360

Metabolism of Arginine by Aging and 7 Day Old Pumpkin Seedlings. WALTER E. SPLITTSTOESSER 361–366

Digestive Secretion of *Dionaea muscipula* (Venus's Flytrap). J. SCALA, K. IOTT, D. W. SCHWAB, AND F. E. SEMERSKY 367–371

6-(γ,γ-Dimethylallylamino) Purine As A Precursor of Zeatin. GEORGE A. MIURA AND CARLOS O. MILLER 372–376

Studies on Spinach Chloroplast and Nuclear DNA Using Large-scale Tissue Preparations ..... Stephen A. Bard and Milton P. Gordon 377–384
Monovalent Ion Stimulated Adenosine Triphosphatase From Oat Roots. James Fisher and T. K. Hodges 385–395
Level of Photosynthetic Intermediates in Isolated Spinach Chloroplasts. Erwin Latzko and Martin Gibbs 396–402
Temperature Regulation of Endogenous Gibberellin Activity and Development of *Tulipa gesneriana* L. L. H. Aung, A. A. De Hertogh, and G. Staby 403–406
Modification of Metabolic Pattern by Variation of Nicotinamide Adenine Dinucleotide Phosphate Level ..... Yukio Yamamoto 407–412
The Respiratory Chain of Plant Mitochondria. III. Oxidation Rates of the Cytochromes *c* and *b* in Mung Bean Mitochondria Reduced With Succinate ..... Bayard T. Storey 413–421
Cyclic Photophosphorylation *in Vivo* and its Relation to Photosynthetic CO_2-Fixation ..... W. Tanner, M. Loffler, and O. Kandler 422–428
Effects of 3,5-Dihalogenated-4-hydroxybenzonitriles on the Activity of Mitochondria From White Potato Tubers. Thomas E. Ferrari and Donald E. Moreland 429–434
Inhibition of the Hill Reaction by Tris and Restoration by Electron Donation to Photosystem II. Takashi Yamashita and Warren L. Butler 435–438
Stronium Mobility in Germinating Seeds and Plants C. R. Creger and W. S. Allen 439–441
Sterol Biosynthesis in Sub-Cellular Particles of Higher Plants. F. F. Knapp, R. T. Aexel, and H. J. Nicholas 442–446
Abscission: Role of Cellulase ..... F. B. Abeles 447–452
Isoenzymes of Glutamate Dehydrogenase in Plants ..... S. B. Yue 453–457
Response of Pea Stem Tissues With Different Phytochrome Contents to Red Light Dosage .. Haven C. Sweet and William S. Hillman 458–460
Artifacts in Intracellular Enzyme Distribution Caused by Alkaline Homogenates ..... P. C. Brandon 461–462
Actions of Gibberellic and Abscisic Acids on Lettuce Seed Germination Without Actions on Nuclear DNA Synthesis. Alan H. Haber, Donald E. Foard, and Stella W. Perdue 463–467
The Physiology of Tumors of Colchicine Treated and Decapitated *Brassica oleracea* ..... W. R. Sharp and D. Davidson 468–470

Number 4. April

Immunochemical Studies on *Arachis hypogaea* Proteins With Particular Reference to the Reserve Proteins. I. Characterization, Distribution, and Properties of α-Arachin and α-Conarachin J. Daussant, N. J. Neucere, and L. Y. Yatsu 471–479
Immunochemical Studies on *Arachis hypogaea* Proteins With Particular Reference to the Reserve Proteins. II. Protein Modification During Germination .. J. Daussant, N. J. Neucere, and E. J. Conkerton 480–484
Carrier-mediated Potassium Efflux Across the Cell Membrane of Red Beet. Ronald J. Poole 485–490
Phototropism and Photoinhibition of Basipolar Transport of Auxin in Oat Coleoptiles ..... J. Shen-Miller, P. Cooper, and S. A. Gordon 491–496
Phosphorus Compounds in Translocating Phloem ..... R. L. Bieleski 497–502
Gibberellin and CCC Effects on Flowering and Growth in the Long-day Plant *Lemna gibba* G3. Charles F. Cleland and Winslow S. Briggs 503–507

Fat Metabolism in Higher Plants. XXXVII. Characterization of the β-Oxidation Systems From Maturing and Germinating Castor Bean Seeds ..... D. HUTTON AND P. K. STUMPF 508–516

Penetration of Iron and Some Organic Substances Through Isolated Cuticular Membranes ..... SESHADRI KANNAN 517–521

Metabolism of the α-Pyridone Ring of Ricinine in *Ricinus communis* L. GEORGE R. WALLER AND JOAN L-C. LEE 522–526

Energy and Electron Transfer Systems of *Chlamydomonas reinhardi*. I. Photosynthetic and Respiratory Cytochrome Systems of the Pale Green Mutant. TETSUO HIYAMA, MITSUO NISHIMURA, AND BRITTON CHANCE 527–534

Photosynthetic Light Reactions in Chemically Fixed *Anacystis nidulans*, *Chlorella pyrenoidosa*, and *Porphyridium cruentum*. U. W. HALLIER AND R. B. PARK 535–539

Action Spectra for Photosystems I and II in Formaldehyde Fixed Algae. C. JOSEPH LUDLOW AND RODERIC B. PARK 540–543

Photosynthetic Light Reactions in Chemically Fixed Spinach Thylakoids. U. W. HALLIER AND R. B. PARK 544–546

Sodium and Potassium Absorption by Bean Stem Tissue. DONALD W. RAINS 547–554

Auxins and Gibberellin-like Substances in Parthenocarpic and Non-parthenocarpic Syconia of *Ficus carica* L., cv. King. FAROOQ LODHI, MURIEL V. BRADLEY, AND JULIAN C. CRANE 555–561

Inhibitory Effect of Carbohydrate on Flowering in *Lemna perpusilla*. I. Interaction of Sucrose With Calcium and Phosphate Ions. HERBERT B. POSNER 562–566

Studies on a Maize Mutant Sensitive to Low Temperature II. Chloroplast Structure, Development, and Physiology. ADELE MILLERD, D. J. GOODCHILD, AND D. SPENCER 567–583

Biosynthesis of Mustard Oil Glucosides: Sodium Phenylacetothiohydroximate and Desulfobenzylglucosinolate, Precursors of Benzylglucosinolate in *Tropaeolum majus*. L. E. W. UNDERHILL AND L. R. WETTER 584–590

The Occurence of δ-Tocopherylquinone in Higher Plants and Its Relation to Senescence ..... RITA BARR AND C. J. ARNTZEN 591–598

Nucleoside Diphosphate-sugar 4-Epimerases I. Uridine Diphosphate Glucose 4-Epimerase of Wheat Germ. DER-FONG FAN AND DAVID SIDNEY FEINGOLD 599–604

Chilling Injury and Changes in Adenosine Triphosphate of Cotton Seedlings. JAMES MCD. STEWART AND GENE GUINN 605–608

Ficin-Catalyzed Reactions. Hydrolysis of α-N-Benzoyl-L-Arginine Ethyl Ester and α-N-Benzoyl-L-Argininamide. D. E. KRAMER AND J. R. WHITAKER 609–614

Modification of 2,4-Dichlorophenoxyacetic Acid Movement in Bean Petioles by Light ..... SHULAMITH HAREL 615–617

Cotyledon Expansion as a Bioassay for Cytokinins. Y. ESASHI AND A. C. LEOPOLD 618–620

The Synthesis of Ribulose-1,5-Diphosphate Carboxylase and Chlorophyll in Virescent Cotton Leaves ..... C. R. BENEDICT AND R. J. KOHEL 621–622

Number 5. May

Changes in Photosensitive Stem Growth in Intact Peas Following Irradiation ..... WILLIAM M. ELLIOTT AND JOHN H. MILLER 623–630

Ethylene-controlled Induction of Phenylalanine Ammonia-lyase in Citrus Fruit Peel ..... J. RIOV, S. P. MONSELISE, AND R. S. KAHAN 631–635

Nitrogen Assimilation and Protein Synthesis in Wheat Seedlings as Affected by Mineral Nutrition. II. Micronutrients.
JAMES E. HARPER AND GARY M. PAULSEN 636–640

Susceptibility to Enzymatic Degradation of Cell Walls From Bean Plants Resistant and Susceptible to *Rhizoctonia solani* Kuhn.
D. F. BATEMAN, H. D. VAN ETTEN, PATRICIA D. ENGLISH, DONALD J. NEVINS, AND P. ALBERSHEIM 641–648

Photosynthetic Activity of Chloroplasts Isolated From Bermudagrass (*Cynodon dactylon* L.), a Species With a High Photosynthetic Capacity ..... T. M. CHEN, R. H. BROWN, AND C. C. BLACK, JR. 649–654

Initial ATP Formation, NADP Reduction, CO_2 Fixation, and Chloroplast Flattening Upon Illuminating Pea Leaves.
PARK S. NOBEL, DIANE CHANG, CHENG-TEH WANG, STEVEN S. SMITH, AND DONALD E. BARCUS 655–661

Determination of the Rate of CO_2 Evolution by Green Leaves in Light.
CHOY-SIN HEW, G. KROTKOV, AND DAVID T. CANVIN 662–670

Effects of Temperature on Photosynthesis and CO_2 Evolution in Light and Darkness by Green Leaves.
CHOY-SIN HEW, G. KROTKOV, AND DAVID T. CANVIN 671–677

Photosynthesis: Action Spectra for Leaves in Normal and Low Oxygen.
N. R. BULLEY, C. D. NELSON, AND E. B. TREGUNNA 678–684

Effects of Phenylmercuric Acetate on Stomatal Movement and Transpiration of Excised *Retula papyrifera* Marsh. Leaves.
Y. WAISEL, G. A. BORGER, AND T. T. KOZLOWSKI 685–690

Metabolism of Urea by *Chlorella vulgaris*.
ROBERT C. HODSON AND JOHN F. THOMPSON 691–696

Effect of Adsorbed Cations on Phosphorus Uptake by Excised Roots.
R. E. FRANKLIN 697–700

The Effect of Manganese on Chloroplast Structure and Photosynthetic Ability of *Chlamydomonas reinhardi*. ..... DORIS TEICHLER-ZALLEN 701–710

Distribution of Calcium Absorbed by All or Part of the Root System of) eans ..... TARIQ A. AL-ANI AND H. V. KOONTZ 711–716

Sugar Transport in Conducting Elements of Sugar Beet Leaves ... P. TRIP 717–725

Carbonic Anhydrase in Marine Algae ..... GERALD W. BOWES 726–732

Metabolism of Barley Seed During Early Hours of Germination.
AREF A. ABDUL-BAKI 733–738

A Short-lived Intermediate Form in the *in Vivo* Conversion of Protochlorophyllide 650 to Chlorophyllide 684 ..... BRUCE A. BONNER 739–747

Translocation of Sugars Into Infected Cabbage Tissues During Clubroot Development ..... N. T. KEEN AND P. H. WILLIAMS 748–754

Determination of Linkages in β-D-Glucans From *Phaseolus aureus* by exo-β-(1→3)-D-Glucanase ..... K. K. BATRA AND W. Z. HASSID 755–758

Potato Sucrose Synthetase: Purification, Properties, and Changes in Activity Associated With Maturation ..... RUSSELL PRESSEY 759–764

Enzymic Mechanism of Starch Breakdown in Germinating Rice Seeds II. Scutellum as the Site of Sucrose Synthesis.
TAKEO NOMURA, YASUHIRO KONO, AND T. AKAZAWA 765–769

Metabolism of ^{14}C-Maltose in *Avena fatua* Seeds During Germination.
SHEPLEY S. C. CHEN AND J. E. VARNER 770–774

Changes in Succinyl CoA Synthetase Activity in Etiolated Bean Leaves Caused by Illumination ..... B. T. STEER AND MARTIN GIBBS 775–780

Delta-Aminolevulnic Acid Dehydrase in Greening Bean Leaves.
B. T. STEER AND MARTIN GIBBS 781–783

Turion Induction in *Spirodela polyrrhiza* by Abscisic Acid.
THOMAS O. PERRY AND O. R. BYRNE 784–785

Metabolism of Carbon-14-Labeled Benzene and Tolueue in Avocado Fruit.
EUGENE F. JANSEN AND ALFRED C. OLSON 786–788

Number 6. June

Respiratory Changes During Seed Germination. Histological Distribution of Respiratory Enzymes and Mobilization of Fat Reserves in Castor Bean Endosperm and Peanut Cotyledons.
PAUL CASTELFRANCO, JOHN LOTT, AND NAAMA SABAR 789–795

Influence of Calcium and Magnesium on Manganese Absorption.
EUGENE V. MAAS, DAVID P. MOORE, AND BENJAMIN J. MASON 796–800

Characterization and Role of an Endogenous Inhibitor in the Induction of Cold Hardiness in *Acer negundo* ..... R. M. IRVING 801–805

The Influence of Syringomycin on Ribonucleic Acid Synthesis.
DONALD PENNER, JAMES E. DEVAY, AND PAUL BACKMAN 806–808

Some Observations on the Bleaching Effect of Ethylenediaminetetraacetic Acid on Green Barley Leaves.
SADAO KOTAKA AND ALBERT P. KRUEGER 809–815

Iron Content and Ferritin in Leaves of Iron Treated *Xanthium pensylvanicum* Plants ..... JOSEPH SECKBACH 816–820

Action of Phytochrome During Prechilling of *Amaranthus retroflexus* L. Seeds ..... R. B. TAYLORSON AND S. B. HENDRICKS 821–825

Leaf Water Balance During Oscillation of Stomatal Aperture.
A. R. G. LANG, BETTY KLEPPER, AND MALCOLM J. CUMMING 826–830

Effects of Picloram and Ethylene on Leaf Movement in Huisache and Mesquite Seedlings ..... J. R. BAUR AND P. W. MORGAN 831–838

The Osmotic Behavior of Corn Mitochondria.
GEORGE H. LORIMER AND RAYMOND J. MILLER 839–844

Nitrogen Metabolism of *Lemna minor*. I. Growth, Nitrogen Sources and Amino Acid Inhibition ..... K. W. JOY 845–848

Nitrogen Metabolism of *Lemna minor*. II. Enzymes of Nitrate Assimilation and Some Aspects of Their Regulation ..... K. W. JOY 849–853

The Kinetics of Amiben Absorption and Metabolism as Related to Species Sensitivity ..... E. W. STOLLER 854–860

Crystalloids of *Phycomyces* Sporangiophores: Nature and Photosensitive Accumulation ..... ROBERT M. THORNTON 861–865

Cytokinin Activation of *de novo* Thiamine Biosynthesis in Tobacco Callus Cultures . DZINTAR E. DRAVNIEKS, FOLKE SKOOG, AND R. H. BURRIS 866–870

Hormonal Control of Cell Proliferation and Xylem Differentiation in Cultured Tissues of *Glycine max* var. Biloxi.
D. E. FOSKET AND J. G. TORREY 871–880

Design Calibration and Field Use of a Stomatal Diffusion Porometer.
E. T. KANEMASU, G. W. THURTELL, AND C. B. TANNER 881–885

Enzymic Degradation of Starch Granules in the Cotyledons of Germinating Peas ..... BIENVENIDO O. JULIANO AND J. E. VARNER 886–892

Transport of Selenate and Selenite into *Astragalus* Roots.
A. SHRIFT AND JANE M. ULRICH 893–896

Persistent Photoreversibility of Leaf Development ..... ATTILA O. KLEIN 897–902

Abscission of Cotton Flower Buds and Petioles Caused by Protein From Boll Weevil Larvae ..... L. E. KING AND H. C. LANE 903–906

Imbition Temperature Sensitivity of Lima Bean Seeds Controlled by Initial Seed Moisture ..... BRUCE M. POLLOCK 907–911

Induction of Phenylalanine Ammonia-lyase in *Xanthium* Leaf Disks. Photosynthetic Requirement and Effect of Daylength .... MILTON ZUCKER 912–922

Direct Relation Between Growth and Frost Hardening in Cabbage Leaves. WESLEY COX AND J. LEVITT 923–928

Absence of Fluorescence Quenching in a Photosynthetic Mutant of *Euglena gracilis.* GEORGE K. RUSSELL, HARVARD LYMAN, AND ROBERT L. HEATH 929–931

Cation Effects on the Fluorescence of Isolated Chloroplasts PETER H. HOMANN 932–936

Light as a Source of Error in Estimates of Water Potential by Vapor Equilibration ..... BRUCE R. ROBERTS 937–938

Number 7. July

The Effect of Reduced Water Potential on Soybean Mitochondria. T. J. FLOWERS AND J. B. HANSON 939–945

Photosynthesis, Photorespiration and Respiration of Chloroplasts From *Acetabularia mediterrania.* R. G. S. BIDWELL, W. B. LEVIN, AND D. C. SHEPHARD 946–954

Ethylene, Seed Germination, and Epinasty. ELLSWORTH R. STEWART AND HUGH T. FREEBAIRN 955–958

Water Potential Increase in Sliced Leaf Tissue as a Cause of Error in Vapor Phase Determinations of Water Potential. HENRY D. BARRS AND PAUL J. KRAMER 959–964

Effect of Light Intensity and Plant Size on Rate of Development of Early Boron Deficiency Symptoms in Tomato Root Tips. CLAIRE B. MACINNES AND LUKE S. ALBERT 965–967

Effect of Lipids on Chloride and Sodium Transport in Bean and Cotton Plants ..... P. J. C. KUIPER 968–972

Effects of Light Quality on the Circadian Rhythm of Leaf Movement of a Short-Day-Plant ..... RUTH HALABAN 973–977

The Use of Nucleoside Phosphotransferase and (^{32}P)p-Nitrophenyl Phosphate in the Determination of the 5′-Linked Termini of Ribosomal RNA ..... VERYL E. BECKER AND CLIFFORD J. POLLARD 978–984

Calcium Uptake by Excised Maize Roots and Interactions With Alkali Cations ..... E. V. MAAS 985–989

Chloroplast Ultrastructure in Mutant Strains of *Chlamydomonas reinhardi* Lacking Components of the Photosynthetic Apparatus. URSULA W. GOODENOUGH AND R. P. LEVINE 990–1000

Photosynthetic Properties of *ac-31,* a Mutant Strain of *Chlamydomonas reinhardi* Devoid of Chloroplast Membrane Stacking. URSULA W. GOODENOUGH, JUDITH J. ARMSTRONG, AND R. P. LEVINE 1000–1012

Short Term Influx as a Measure of Influx Across the Plasmalemma. W. J. CRAM 1013–1015

Magnesium Nutrition of Two Species of Sunflower. OM P. MADHOK AND RICHARD B. WALKER 1016–1022

Metabolism of Glutamic Acid and *N*-Acetylglutamic Acid in Leaf Discs and Cell-free Extracts of Higher Plants. CLAYTON J. MORRIS, JOHN F. THOMPSON, AND CATHLEEN M. JOHNSON 1023–1026

Zea Shoot Development in Response to Red Light Interruption of the Dark-Growth Period. I. Inhibition of First Internode Elongation. S. O. DUKE AND J. L. WICKLIFF 1027–1030

The Effect of Salinity on the Malic Dehydrogenase of Pea Roots. EDNA HASON-PORATH AND ALEXANDER POLJAKOFF-MAYBER 1031–1034

Cytokinins From a Variant Strain of Cultured Soybean Cells.
GEORGE A. MIURA AND CARLOS O. MILLER 1035–1039

Oligomycin Inhibition of Phosphate Uptake and ATP Labeling in Excised Maize Roots ..... CAROLYN BLEDSOE, C. V. COLE AND CLEON ROSS 1040–1044

Computer Analysis of the Leaf Movements of Pinto Beans.
TAKASHI HOSHIZAKI AND K. C. HAMNER 1045–1050

Growth Promotion in Pea Stem Sections. III. By Alkyl Nitriles, Alkyl Acetylenes and Insect Juvenile Hormones.
BRUCE B. STOWE AND VERA WAHBE HUDSON 1051–1057

Presence of ADP-Glucose Pyrophosphorylase in Shrunken-2 and Brittle-2 Mutants of Maize Endosperm.
DAVID B. DICKINSON AND JACK PREISS 1058–1062

Cellular Localization of CO_2 Fixation and Translocation of Metabolites.
DALE N. MOSS AND H. PAUL RASMUSSEN 1063–1068

Physiological Comparisons of Pith Callus With Crown-Gall and Genetic Tumors of *Nicotiana glauca, N. langsdorffii,* and *N. glauca-langsdorffii* Grown *in Vitro.* I. Tumor Induction and Proliferation.
W. R. SHARP AND J. E. GUNCKEL 1069–1072

Physiological Comparisons of Pith Callus With Crown-Gall and Genetic Tumors of *Nicotiana glauca, N. langsdorffii,* and *N. glauca-langsdorffii* Grown *in Vitro.* II. Nutritional Physiology.
W. R. SHARP AND J. E. GUNCKEL 1073–1080

Number 8. August

Long-lived Intermediates in Phytochrome Transformation I: *In Vitro* Studies ..... WINSLOW R. BRIGGS AND DAVID C. FORK 1081–1088

Long-lived Intermediates in Phytochrome Transformation II: *In Vitro* and *In Vivo* Studies ..... WINSLOW R. BRIGGS AND DAVID C. FORK 1089–1094

Radial Transport of Ions in Roots ..... GRACE HU YU AND P. J. KRAMER 1095–1100

Mechanism of the Seismonastic Reaction in *Mimosa pudica.*
ROBERT D. ALLEN 1101–1107

Iron Accumulation, Root Peroxidase Activity, and Varietal Interactions in Soybean Genotypes That Differ in Iron Nutrition.
G. W. ELMSTROM AND F. D. HOWARD 1108–1114

Inhibition of Photosynthesis by Oxygen in Isolated Spinach Chloroplasts.
PETER W. ELLYARD AND MARTIN GIBBS 1115–1121

Calibration of Infra-red CO_2 Gas Analyzers.
G. C. BATE, A. D'AOUST, AND D. T. CANVIN 1122–1126

Control of Apple Ripening by Succinic Acid 2,2-Dimethyl Hydrazide, 2-Chloroethyltrimethyl-ammonium Chloride, and Ethylene.
NORMAN E. LOONEY 1127–1131

Involvement of Aminoacyl-tRNA Transfer Factors in Polyphenylalanine Synthesis by Rice Embryo Ribosomes ..... ALVA A. APP 1132–1138

Abscission: Quantitative Measurement With a Recording Abscissor.
L. E. CRAKER AND F. B. ABELES 1139–1143

Abscission: Role of Abscisic Acid ..... L. E. CRAKER AND F. B. ABELES 1144–1149

Evidence for an Inactivating System of Nitrate Reductase in *Hordeum vulgare* L. during Darkness That Requires Protein Synthesis.
R. L. TRAVIS, W. R. JORDAN, AND R. C. HUFFAKER 1150–1156

Transport and Metabolism of Indole-3-Acetic Acid in *Coleus Petiole* Segments of Increasing Age .... HENK VEEN AND WILLIAM P. JACOBS 1157–1162

Trehalase: A New Pollen Enzyme.
ARNOLD E. S. GUSSIN, JEFFREY H. MCCORMACK, LUCILLE YIH-LO WAUNG, AND DOREEN S. GLUCKIN 1163–1168

Studies on Auxin Protectors. VII. Association of Auxin Protectors With Crown Gall Development in Sunflower Stems ..... Tom Stoner 1169–1174

A Quantitative Estimation of Alkali-labile Indole-3-Acetic Acid Compounds in Dormant and Germinating Maize Kernels. Minoru Ueda and Robert S. Bandurski 1175–1181

Magnesium Uptake by Soybeans ..... J. E. Leggett and W. A. Gilbert 1182–1186

Synthesis and Secretion of Hydroxyproline Containing Macromolecules in Carrots. I. Kinetic Analysis ..... Maarten J. Chrispeels 1187–1193

Ethylene Evolution Stimulated by Chilling in Citrus and Persea Sp. W. C. Cooper, G. K. Rasmussen, and E. S. Waldon 1194–1196

The Effect of Tungstate on Nitrate Assimilation in Higher Plant Tissues. Yair M. Heimer, John L. Wray, and Philip Filner 1197–1199

Regulation of the Onset of Dormancy in Tubers of *Begonia evansiana*. Y. Esashi and A. C. Leopold 1200–1202

Ethylene Evolution From 2-Chloroethylphosphonic Acid ..... S. F. Yang 1203–1204

Removal of Zinc From Phosphate Solutions by Anion-Exchange. D. O. Wilson and H. M. Reisenauer 1205–1206

Number 9. September

Nucleic Acid Metabolism During Cytokinin Induced Cellular Differentiation. Michael J. Schneider, Julia C. J. Lin, and Folke Skoog 1207–1210

Blockage by Gibberellic Acid of Phytochrome Effects on Growth, Auxin Responses, and Flavonoid Synthesis in Etiolated Pea Internodes. D. W. Russell and A. W. Galston 1211–1216

β-Alanine as an Ethylene Precursor. Investigations Towards Preparation and Properties, of a Soluble Enzyme System From a Subcellular Particulate Fraction of Bean Cotyledons. Robert A. Stinson and Mary Spencer 1217–1226

A Survey of the Sequence of Some Effects of Gibberellic Acid in the Metabolism of Cereal Grains ..... Clifford J. Pollard 1227–1232

Adaptation of Barley Roots to Low Oxygen Supply and its Relation to Potassium and Sodium Uptake ..... M. G. Pitman 1233–1240

Influence of Age and Sulfur Metabolism on ATP Sulfurylase Activity in the Soybean and a Survey of Selected Species. C. A. Adams and R. W. Rinne 1241–1246

Influence of Benzyladenine, Leaf Darkening, and Ringing on Movement of ^{14}C-labeled Assimilates Into Expanded Leaves of *Vitis vinifera* L. J. D. Quinlan and R. J. Weaver 1247–1252

Regulation of Sulfate Uptake by Amino Acids in Cultured Tobacco Cells. James W. Hart and Philip Filner 1253–1259

Effects of Univalent Cations on the Activity of Particulate Starch Synthetase ..... Ronald E. Nitsos and Harold J. Evans 1260–1266

Uptake of 3-*o*-Methylglucose by Healthy and *Hypomyces*-infected Squash Hypocotyls ..... Joseph G. Hancock 1267–1272

Pear Bud Metabolism: Seasonal Changes in Glucose Utilization. Richard H. Zimmerman and Miklos Faust 1273–1276

Movement and Metabolism of Kinetin-^{14}C and of Adenine-^{14}C in *Coleus* Petiole Segments of Increasing Age. Henk Veen and William P. Jacobs 1277–1284

Phytochrome Control of Maize Leaf Inorganic Pyrophosphatase and Adenylate Kinase ..... Larry G. Butler and Vienna Bennett 1285–1290

Polyribosome Isolation in the Presence of Diethyl Pyrocarbonate. Donald P. Weeks and A. Marcus 1291–1294

Hormonal Regulation of Cell Elongation in the Hypocotyl of Rootless Soybean: An Evaluation of the Role of DNA Synthesis.
ROBERT E. HOLM AND JOE L. KEY 1295–1302

Tryptophan as an Auxin Precursor in Cucumber Seedlings.
JOHN E. SHERWIN AND WILLIAM K. PURVES 1303–1309

Photosynthetic Studies on a Pea-mutant Deficient in Chlorophyll.
H. R. HIGHKIN, N. K. BOARDMAN, AND D. J. GOODCHILD 1310–1320

Effect of Vanadium on Growth, Chemical Composition, and Metabolic Processes of Mature Sugar Beet (*Beta vulgaris* L.) Plants.
B. SINGH AND D. J. WORT 1321–1327

Carbon Dioxide Exchanges in Leaves. I. Discrimination Between $^{34}CO_2$ and $^{12}CO_2$ in Photosynthesis ... E. W. YEMM AND R. G. S. BIDWELL 1328–1334

The Effect of Respiratory Inhibitors on NADH, Succinate and Malate Oxidation in Corn Mitochondria .. R. H. WILSON AND J. B. HANSON 1335–1341

Photooxidation by Photosystem II of Tris-washed Chloroplasts.
TAKASHI YAMASHITA AND WARREN L. BUTLER 1342–1346

Precursors of Ethylene ..... A. H. BAUR AND S. F. YANG 1347–1349

Direct Determination of Potassium Ion Accumulation in Guard Cells in Relation to Stomatal Opening in Light.
B. L. SAWHNEY AND ISRAEL ZELITCH 1350–1354

A Site With an Affinity for Heavy Metals on the Thylakoid Membranes of Chloroplasts.
DINKAR D. SABNIS, MILDRED GORDON, AND ARTHUR W. GALSTON 1355–1363

Apparent Changes in Rate of Kaurene Biosynthesis During the Development of Pea Seeds..RONALD C. COOLBAUGH AND THOMAS C. MOORE 1364–1367

Oxygen Requirement for Ethane Production *in Vitro* by *Phaseolus vulgaris*.
ROY W. CURTIS 1368–1370

Number 10. October

Comparative Studies of Effect of Auxin and Ethylene on Permeability and Synthesis of RNA and Protein.
JOSEPH A. SACHER AND SEPPO O. SALMINEN 1371–1377

Leaf Water Potential of Differentially Salinized Plants.
MARY BETH KIRKHAM, W. R. GARDNER, AND G. C. GERLOFF 1378–1382

Effects of External Cations and Respiratory Inhibitors on Electrical Potential of the Xylem Exudate of Excised Corn Roots.
ROBERT F. DAVIS AND N. HIGINBOTHAM 1383–1392

Translocation and Distribution of Picloram in Bean Plants Associated With Nastic Movements ..... C. P. P. REID AND W. HURTT 1393–1396

Movement and Fate of *p*-Nitrophenyl-α,α,α-Trifluoro-2-Nitro-*p*-Tolyl Ether-1′-^{14}C in Peanut Seedlings ..... E. F. EASTIN 1397–1401

Flower Formation in Excised Tobacco Stem Segments; I. Methodology and Effects of Plant Hormones.
WILLIAM L. WARDELL AND FOLKE SKOOG 1402–1406

Flower Formation in Excised Tobacco Stem Segments; II. Reversible Removal of IAA Inhibition by RNA Base Analogues.
WILLIAM L. WARDELL AND FOLKE SKOOG 1407–1412

Environmentally-Induced Changes in the Fatty Acids of *Chlorella*.
LEAL G. DICKSON, RAYMOND A. GALLOWAY, AND GLENN W. PATTERSON 1413–1416

Simulation of Cl^- Uptake by Low-salt Barley Roots as a Test of Models of Salt Uptake ..... M. G. PITMAN 1417–1427

The Effect of Ultracentrifugation on Fine Structure and α-Amylase Production in Barley Aleurone Cells ..... Rusell L. Jones 1428–1438

On the Molecular Identity of ESR Signal II Observed in Photosynthetic Systems: The Effect of Heptane Extraction and Reconstruction With Plastoquinone and Deuterated Plastoquinone. Daniel H. Kohl and Patrick M. Wood 1439–1445

Stimulation of Ethylene Production in Tomato Tissue by Propionic Acid. Morris Liberman and A. T. Kunish 1446–1450

Photosynthetic Studies With Leaf Cell Suspensions From Higher Plants. A. Gnanam and G. Kulandaivelu 1451–1456

Factors Related to Iron Absorption by Enzymically Isolated Leaf Cells. Seshadri Kannan 1457–1460

Effect of Potassium Deficiency Upon Translocation of ^{14}C in Attached Blades and Entire Plants of Sugarcane ..... Constance E. Hartt 1461–1469

Dormancy Regulation in Subterranean Clover Seeds by Ethylene. Y. Esashi and A. C. Leopold 1470–1472

Postharvest Response of Oranges to Ethylene. Y. Aharoni, F. S. Latar (Littauer), and S. P. Monselise 1473–1474

Occurence of RNA in Glyoxysomes From Caster Bean Endosperm. B. P. Gerhardt and Harry Beevers 1475–1477

Evidence for the Presence of Protochlorophyllase in Etiolated Wheat Seedlings ..... C. B. Jones and R. K. Ellsworth 1478–1480

Number 11. November

Independence of Lateral and Differential Longitudinal Movement of Indoleacetic Acid in Geotropically Stimulated Coleoptiles of *Zea mays*. Alan R. Cane and Malcolm B. Wilkins 1481–1487

Enzymes Associated with Protein Bodies Isolated from Ungermiated Barley Seeds ..... Robert L. Ory and Knud W. Henningsen 1488–1498

Acid-Soluble Nucleotides of Pinto Bean Leaves at Different Stages of Development. L. H. Weinstein, D. C. McCune, Jill F. Mancini, and P. van Leuken 1499–1510

Effect of Pyrophosphate on Photosynthetic Electron Transport Reactions. Giorgio Forti and Emilia Maria Meyer 1511–1514

Photophosphorylation during Chloroplast Development in Red Kidney Bean. I. Characterization of the Mature System and the Effect of BSA and Sulfhydryl Reagents. Charles D. Howes and Arthur I. Stern 1515–1522

Polygalactolipids in Spinach Chloroplast. D. E. Webster and S. B. Chang 1523–1527

Accumulation of Potassium and Sodium by Barley Roots in a K-Na Replacement Series ..... A. J. Hiatt 1528–1532

The Formation of Ribulose Diphosphate Carboxylase Protein during Chloroplast Development in Barley .... C. Gamini Kannangara 1533–1537

Kinetic Behavior of Electron Paramagnetic Resonance Signal I. II. Comparison of Wild Type and Mutant (ac-206) *Chlamydomonas reinhardtii* ..... Ellen C. Weaver 1538–1541

Stomatal Diffusion Resistance of Snap Beans. II. Effect of Light. E. T. Kanemasu and C. B. Tanner 1542–1546

Stomatal Diffusion Resistance of Snap Beans. I. Influence of Leaf-Water Potential ..... E. T. Kanemasu and C. B. Tanner 1547–1552

IAA Oxidase Inhibitors from Normal and Mutant Maize Plants. D. Gelinas and S. N. Postlethwait 1553–1559

Multiple Molecular Forms of Ficin—Evidence Against Autolysis as Explanation ..... Donald E. Kramer and John R. Whitaker 1560–1565

Nature of the Conversion of *Ficus carica* Variety Kadota Ficin Component D to Component C. Some Physicochemical Properties of Components C and D .... Donald E. Kramer and John R. Whitaker 1566–1573

Multiple Molecular Forms of *Ficus glabrata* Ficin. Their Separation and Relative Physical, Chemical, and Enzymatic Properties. Don C. Williams and John R. Whitaker 1574–1583

Ethylene and Carbon Dioxide in the Growth and Development of Cultured Radish Roots ..... J. W. Radin and R. S. Loomis 1584–1589

Cytochrome Oxidase Activity in *Blastocladiella emersonii*. Paul A. Horgen and David H. Griffin 1590–1593

Plant Suspension Culture Media Macromolecules—Pectic Substances, Protein, and Peroxidase. Alfred C. Olson, John J. Evans, Doris P. Frederick, and Eugene F. Jansen 1594–1600

Synergistic Effects of Metabolically Related Amino Acids on the Growth of a Multicellular Plant ..... Valgene L. Dunham and J. K. Bryan 1601–1608

Plastid Development in Albescent Maize. Robert F. Troxler, Roger Lester, Floyd O. Craft, and J. T. Albright 1609–1618

Nonphotosynthetic Retardation of Chloroplast Senescence by Light. Alan H. Haber, Paula J. Thompson, Patricia L. Walne, and Larry L. Tripplett 1619–1628

Properties and Ultrastructure of Phycoerythrin from *Porphyridium cruentum* ..... E. Gantt..1629–1538

Role of the Accompanying Anion in the Effect of Calcium Salts on Potassium Uptake by Excised Barley Roots. Toshiaki Tadano, J. H. Baker, and Mack Drake 1639–1644

Photoreduction of 2,6-Dichlorophenolindophenol by Diphenylcarbazide: A Photosystem 2 Reaction Catalyzed by Tris-Washed Chloroplasts and Subchloroplast Fragments. Leo P. Vernon and Elwood R. Shaw 1645–1649

The Induction of Nitrate Reductase, and the Preferential Assimilation of Ammonium in Germinating Rice Seedlings ..... T. C. Shen 1650–1656

Number 12. December

Translocation and Accumulation of Translocate in the Sugar Beet Petiole. D. R. Geiger, M. A. Saunders, and D. A. Cataldo 1657–1665

Symbiotic Effectiveness and N_2 Fixation in Nodulated Soybean. Charles Sloger 1666–1668

Immunological Distinction Between Fraction I Protein and Protochlorophyllide Holochrome .. Richard H. Falk and Lawrence Bogorad 1669–1671

Herbicide Metabolism in Plants: Specificity of Peroxidases for Aniline Substrates ..... H. B. Lieb and C. C. Still 1672–1673

Simultaneous Reactivation of Ultraviolet Damage in Xanthium Leaves. Morris G. Cline, Gerald I. Conner, and Frank B. Salisbury 1674–1678

The Warburg Effect in a Chloroplast-Free Preparation from *Euglene gracilis* ..... Peter W. Ellyard and Anthony San Pietro 1679–1683

Effect of Sublethal and Lethal Temperatures on Plant Cells. J. W. Daniell, W. E. Chappell, and H. B. Couch 1684–1689

Ethylene Modification of an Auxin Pulse in Cotton Stem Sections. Elmo M. Beyer, Jr. and Page W. Morgan 1690–1694

Similarities Between Gibberellins and Related Compounds in Inducing Acid Phosphatase and Reducing Sugar Release from Barley Endosperm. KENNETH C. JONES 1695–1700

The Control of Growth Habit of Marquillo x Kenya Farmer Wheat Dwarf I by Temperature ..... JOHN D. MAHON AND DAVID T. CANVIN 1701–1705

Morphogenesis in *Schizophyllum commune*. I. Effects of White Light. JOHN H. PERKINS 1706–1711

Morphogenesis in *Schizophyllum commune*. II. Effects of Monchromatic Light ..... JOHN H. PERKINS AND SOLON A. GORDON 1712–1716

Activity of Pectin Esterase and Cellulase in the Abscission Zone of Citrus Leaf Explants .... ARIEL RATNER, R. GOREN, AND S. P. MONSELISE 1717–1723

Relation of CO_2 Compensation Concentration to Apparent Photosynthesis in Maize ..... GARY H. HEICHEL AND ROBERT B. MUSGRAVE 1724–1728

Changes in Nucleic Acid Fractions of Seed Components of Red Pine (*Pinus resinosa* Ait.) during Germination. S. SASAKI AND G. N. BROWN 1729–1733

Phytochrome in Cultured Wild Carrot Tissue. I. Synthesis. DONALD F. WETHERELL 1734–1737

A Simple Method to Obtain High Frequency of Stalk Division in *Acetabularia mediterranea*. SILVANO BONOTTO AND ELIANE BONNIJNS-VAN GELDER 1738–1741

Methyl Chlorophyllide *a* as a Probable Intermediate in the Chlorophyll *a* Pathway ..... G. D. HINES AND R. K. ELLSWORTH 1742–1744

Isolation of Octopamine from Annual Rye Grass. B. C. HARDWICK AND B. AXELROD 1745–1746

Floral Induction in a Short-Day Plant, *Plumbago indica* L., by 2-Chloroethanephosphonic Acid ..... COLETTE NITSCH AND J. P. NITSCH 1747–1748

Studies on Flowering Responses of *Urena lobata* .. ILABANTA MUKHERJEE 1749–1751
